

CLOCKWISE FROM THE TOP The focal point of the spaces are the cantilevered floating wood steps with the artistic projection in a Prussian blue backdrop; The waiting lobby rests on a contemporary design; Two units connected internally to use the advantage of passive ventilation

TOP OF THE WORLD PENTHOUSE PĀFEKTO

An architectural expression of wonder, know-how and sheer poetry by Conarch Architects

Designed for a lively and immersive experience, this multi-level penthouse by Conarch Architects is built on a design vision centered on transforming a generic apartment into a functional and versatile living space. Creating a spacious haven with ample natural light, the customised and luxurious Penthouse Pāfekuto is a melody of balance, contrast, proportion and colour. Set against the Prussian blue backdrop, the highlight of the house is the cantilevered floating wood staircase. Created in a simple style that belies its complexity, this masterpiece of a staircase allows uninterrupted conversation and emphasizes the interconnected relationship between the levels — a masterstroke by architect S K Goel. Changing the perception that high-rise living is synonymous with a detached and solitary existence, most of the enclosures in this penthouse open directly into green outdoor terraces, presenting a view that instantly refreshes and rejuvenates your soul. This design project embraces the myriad desires and wishes of the client and presents an abode of decadence and fine living. ♦Sakshi Rai Address: VVIP Addresses, Ghaziabad, UP Website : www.conarch.co
